1. Interest and Present Value
   - Compound Interest
   - Annuities
   - Bonds
   - Rate of Return
   - Exercises

2. Probability Spaces
   - Sample Spaces and Events
   - Finite Probability Spaces
   - General Probability Spaces
   - Conditional Probability
   - Independence
   - Exercises

3. Random Variables
   - Definition and General Properties
   - Discrete Random Variables
   - Continuous Random Variables
   - Joint Distributions
   - Independent Random Variables
   - Sums of Independent Random Variables
   - Exercises
4. Options and Arbitrage
   - Arbitrage
   - Forwards
   - Currency Forwards
   - Futures
   - Options
   - Properties of Options
   - Dividend-Paying Stocks
   - Exercises

5. Discrete Time Portfolio Processes
   - Discrete Parameter Stochastic Processes
   - Self-Financing Portfolios
   - Option Valuation by Portfolios
   - Exercises

6. Expectation of a Random Variable
   - Discrete Case: Definition and Examples
   - Continuous Case: Definition and Examples
   - Properties of Expectation
   - Variance of a Random Variable
   - The Central Limit Theorem
   - Exercises

7. The Binomial Model
   - Construction of the Binomial Model
   - Pricing a Claim in the Binomial Model
   - The Cox-Ross-Rubenstein Formula
   - Exercises

8. Discrete Parameter Martingales
   - Construction of Conditional Expectation
   - Examples of Conditional Expectation
   - Properties of Conditional Expectation
   - Discrete Parameter Martingales
   - Exercises
9. The Binomial Model Revisited
   - Martingales in the Binomial Model
   - Change of Probability
   - American Style Claims in the Binomial Model
   - Stopping Times
   - Optimal Exercise of an American Style Claim
   - Dividends in the Binomial Model
   - The General Finite Market Model
   - Exercises

10. Stochastic Calculus
   - Differential Equations
   - Continuous Parameter Stochastic Processes
   - Brownian Motion
   - Variation of Brownian Paths
   - Riemann-Stieltjes Integrals
   - Stochastic Integrals
   - The Ito-Doeblin Formula
   - Stochastic Differential Equations
   - Exercises

11. The Black-Scholes-Merton Model
   - The Stock Price SDE
   - Continuous Time Portfolios
   - The Black-Scholes-Merton PDE
   - Properties of the BSM Call Function
   - Exercises

12. Continuous Parameter Martingales
   - Conditional Expectation
   - Definition and Examples
   - Martingale Representation Theorem
   - Moment Generating Functions
   - Change of Probability. Girsanov’s Theorem
   - Exercises
13. BSM Model Revisited
   • Risk-Neutral Valuation of a Derivative
   • Proofs of Valuation Formulas
   • Valuation Under the Original Measure
   • The Feynman-Kac Representation Theorem
   • Exercises

14. Other Options
   • Currency Options
   • Forward Start Options
   • Chooser Options
   • Compound Options
   • Path dependent Derivatives
   • Barrier Options
   • Lookback Options
   • Asian Options
   • Quantos
   • Options on Dividend-Paying Stocks
   • Continuous Case
   • Discrete Case
   • American Style Claims in the BSM Model
   • Exercises

15. APPENDIX A: Sets and Counting
16. APPENDIX B: Solution of the BSM PDE
17. APPENDIX C: Analytical Properties of BSM Call Function
18. APPENDIX D: Solutions to Selected Exercises
19. Bibliography
20. Index
