Rémi Jedwab is an assistant professor of Economics and International Affairs at the Elliott School and the Department of Economics of George Washington University. He received his Ph.D. in economics from the Paris School of Economics. He was also a visiting Ph.D. student at the London School of Economics for three years. Professor Jedwab's main field of research is urban economics, though his work also has strong development economics, political economy/public economics, economic history, trade and environmental economics themes. Some of the issues he has studied include urbanization and structural transformation, the economic effects of transportation infrastructure, the role of institutions in development, and agricultural and economic development in the developing world, and Sub-Saharan Africa in particular. His research has been published in the American Economic Review, the Review of Economics and Statistics, the Economic Journal, the Journal of Economic Growth and the Journal of Urban Economics. Recently, Professor Jedwab’s research areas have included the phenomenon of urbanization without economic growth, and his research has been highlighted by The Atlantic's CityLab and the Boston Globe.
