

Project Assignment #5: Webpage

Specifications:

- Obtain URL and web hosting from GoDaddy.com
 - <http://www.godaddy.com>
 - You may use other service providers, but demos will be on Go Daddy servers.
- Produce a single webpage containing minimally:
 - An external link
 - A heading
 - Multiple paragraphs of text
 - An image
- Page must be live on the web and accessible via a link sent to the instructor.
- Content is up to the student, it is not the focus on of the grade, however, a website on a topic will be more impressive to me than a “personal home page.”
- This is an individual assignment
- Posting anything (even this assignment) to the web is considered a form of publishing. You must be aware of copyright laws and etc.

Objectives:

1. Demonstrate basic web and HTML skills
2. Practice presenting information in the web medium

Helpful info

- Lecture on 10/19
- Lab on 10/21
- Hayes Book

Deliverables

- URL and web hosting with FTP access Oct. 19
- Link emailed to instructor by 5pm Nov. 6

Questions?

- Some of your classmates are skilled in this area, you can help each other (especially with URL registration and web hosting), but each student should write their own code for the assignment.
