

$$W_1 = 1$$

The diagram illustrates a simplification of a sequence of weights. On the left, a horizontal yellow bar is divided into three sections: an empty section on the left, a section containing an ellipsis (\dots), and a section containing the label W_{n+1} . A large, white, double-lined bracket is positioned over the ellipsis and the W_{n+1} section. To the right of this bar is an equals sign, followed by another horizontal yellow bar. This second bar is divided into two equal sections, each containing the label W_n .

$$\dots W_{n+1} = W_n W_n$$
